Neuryo v6 prototype buy plan

9 Nov 2026 · for v6 with the rev B board (77 × 50 mm, KiCad) · prices marked 9 Nov were read on the seller page today; 7 Nov / 8 Nov come from your v4.4 and v5.2 plans; yellow rows are estimates · USD at ₹94.05 mid-market (7 Nov), ₹97.34 on the card

What	When	Total
Domestic orders: Upside Down Labs, Robu, Probots, Vishaworld, Robocraze, Amazon, ToolBuy, chemist	Now	₹20,574
FRI TDE-211 Ag/AgCl pod cores × 6 (import through VIT)	Now (2–3 weeks by DHL)	₹8,640
Rev B board × 2 assembled at JLCPCB, Standard PCBA double-sided (import through VIT)	After the professor's review	₹32,819
Total, imports through VIT		**₹62,033**
If the VIT lab has PETG, TPU, a 0.01 g scale and a caliper (−₹3,617)		₹58,416
If both imports go as personal imports instead (42.08% duty)		₹73,833

Recommendation. Order the domestic lists and the FRI pods now, and the boards the day your professor signs off. Through VIT this lands at about **₹62,033** (₹58,416 if the lab has the filament and tools), about ₹8,416 over the ₹50,000 grant. The board is the biggest line and the one that decides the demo, so this plan pays for JLCPCB to place both sides of it rather than you hand-soldering the 17 input filter capacitors on the underside (that option saves about ₹6,341; section 3). Upload the rev B Gerbers, positions and bom-jlc.csv to JLCPCB for the real quote before paying.

Changes from your v4.4 and v5.2 plans. Rev B now exists, so the board is priced from its BOM. Standard PCBA (double-sided) replaces Economic, because rev B has 28 parts on the bottom. No ESP32-S3 DevKitC (a spare XIAO does bench firmware), no Koss headphones (v5 arch only), no BMI270 chips on the board (rev B takes a breakout on J7), no PA12 band (PETG is enough for the demo), no PVA powder or glycerol. Added: a TP4056 charger and a spare cell (the review says to charge cells outside the headset), JST leads (the only in-stock cell has the wrong plug), the logic analyzer (back in stock), a second BMI270 for the second board, and Ten20 paste as demo insurance.

1 · Order now: domestic

Upside Down Labs

Item	For	Qty	Price	Line	Read	Link
UDL colour snap cables, pack of 10 (100 cm, snap one end)	11 leads: Fp1, Fp2, Fpz bias, eye, M1, M2, Fz, Cz, Pz + 2 ECG; cut the plug end and solder into the board holes	2	₹1,999	₹3,998	9 Nov	store.upsidedownlabs.tech/product/different-color-s…
UDL Neo Gel electrodes, 100 pcs (3.2 × 2.5 cm)	Forehead pads (Fp1, Fpz, Fp2), M1, M2, eye pad, ECG pair	1	₹799	₹799	9 Nov	store.upsidedownlabs.tech/product/neo-gel-electrode…
Upside Down Labs total	Free delivery above ₹999 (store page).			**₹4,797**		

Robu

Item	For	Qty	Price	Line	Read	Link
Seeed Studio XIAO ESP32S3 (plain, not Sense/Plus)	1 for bench firmware now + 1 per board (rev B footprint is the plain XIAO)	3	₹1,139	₹3,417	9 Nov	robu.in/product/seeed-studio-xiao…
PETG 1.75 mm, 1 kg (skip if the lab has it)	Pods, midline band (fit tests), carriages, anchor, cam lock, ear clip	1	₹780	₹780	7 Nov	robu.in/product/numaker-petg-hs-1…
TPU 95A 1.75 mm, 1 kg (skip if the lab has it)	Midline band tail through the cam lock (v6 needs it); linings can be the silicone sheet	1	₹2,149	₹2,149	est	
Robu total	XIAO in stock on 9 Nov (Robu search page). Filament: skip if the VIT printer room has it.			**₹6,346**		

Probots

Item	For	Qty	Price	Line	Read	Link
Li-ion 3.7 V 950 mAh YB-503450, protected (50 × 34 × 5 mm)	1 per board + 1 spare; its plug is listed as 3-pin 1.25 mm, so fit the 2 mm JST lead below	3	₹399	₹1,197	9 Nov	probots.co.in/lithium-ion-rechargeable-…
TP4056 1 A charger module, Type-C, with DW01 protection	Rev B review change 3: charge the cells outside the headset	2	₹49	₹98	9 Nov	probots.co.in/tp4056-1a-li-ion-lithium-…
GY-MAX30102 pulse sensor	Earlobe clip + spare; check the I²C pull-ups go to 3.3 V	2	₹199	₹398	9 Nov	probots.co.in/search/max30102
USB logic analyzer, 24 MHz, 8 ch	Debug the ADS1299 SPI and the USB interlock at bring-up	1	₹449	₹449	9 Nov	probots.co.in/search/logic%20analyzer%2…
Probots shipping		1	₹99	₹99	7 Nov	
Probots total	₹99 flat shipping under ₹4,999 (7 Nov plan). Only in-stock protected cell on 9 Nov.			**₹2,241**		

Vishaworld

Item	For	Qty	Price	Line	Read	Link
7Semi BMI270 Nano IMU (Qwiic)	Rev B: breakout on a 4-wire lead to J7, 1 per board	2	₹501	₹1,002	9 Nov	vishaworld.com/search
Vishaworld total	Shipping shown at checkout.			**₹1,002**		

Robocraze

Item	For	Qty	Price	Line	Read	Link
2 mm pitch 2-pin JST cable with connector, pack of 10	Battery leads into J1 (JST-PH 2.0); check polarity against the "+" on the board	1	₹55	₹55	9 Nov	robocraze.com/search
Robocraze total	Free delivery from ₹999; this order is small, so add it to another Robocraze order or expect a delivery fee.			**₹55**		

Amazon.in

ToolBuy total	Dispatch in 2 business days.			**₹712**		

Chemist

Item	For	Qty	Price	Line	Read	Link
0.9% saline + three 1 ml syringes (no needle)	Wetting the pod tips	1	₹60	₹60	est	
Chemist total				**₹60**		

2 · Imports (route both through VIT purchase)

FRI TDE-211 reusable Ag/AgCl snap electrode	Amount	Link
6 × ₹500 (read 9 Nov on FRI's store): 3 pods + 1 for the Pz paste fallback + 2 spares. DHL is the same for 4 or 6, so the spares cost about ₹1,100 landed instead of a second ₹4,400 shipment	₹3,000	fri-fl-shop.com/products/reusable-snap-ag…
DHL shipping (your 29 Oct cart; FRI shows it only at checkout)	₹4,400	
Duty and clearance through VIT (~10% + ₹500, plan assumption)	₹1,240	
FRI total through VIT (personal import ₹11,014)	**₹8,640**	

Gate: the professor's review of rev B. Leave the electrode headers (J10–J19), J6, J7 and the XIAO off the JLCPCB order: you solder the leads and the XIAO (its underside pads need hot air or a hot plate, so borrow the lab's). J1, JP1 and TP1 are through-hole: solder them yourself too.

Rev B, 2 boards assembled at JLCPCB (Standard PCBA, both sides)	USD	Read	Link
4-layer PCB, 1.6 mm, 77 × 50 mm, 5 pcs	$10.00	est	
Standard PCBA engineering fee, double-sided	$51.12	9 Nov	jlcpcb.com/help/article/pcb-assembly…
Stencil, double-sided assembly	$16.42	9 Nov	jlcpcb.com/help/article/pcb-assembly…
Component loading, about 29 SMT part types × $1.53	$44.37	est	jlcpcb.com/help/article/pcb-assembly…
SMT joints, about 1,040 × $0.0016	$1.66	est	jlcpcb.com/help/article/pcb-assembly…
ADS1299IPAGR × 2 at $70.817 (367 in stock)	$141.63	9 Nov	jlcpcb.com/partdetail/TexasInstrumen…
LM27762DSSR × 2, TPS7A2033PDBVR × 2, TPD4E1B06DCKR × 10	$6.64	7 Nov	jlcpcb.com/parts/componentSearch
0.1 % thin-film resistors, C0G caps, other passives, Q1, SW1 (bom-jlc.csv)	$15.00	est	
Shipping to India	$15.00	est	
Board total $301.84 × ₹97.34 = ₹29,381; through VIT (~10% + ₹500) **₹32,819**; personal import ₹42,245	**$301.84**		

3 · Options and what not to buy

Option	Effect
Economic PCBA, top side only, and hand-solder the 28 bottom parts	About ₹26,478 instead of ₹32,819 (saves about ₹6,341). Not recommended: the 17 underside parts are the input filter capacitors on the noise-critical analog half, and those parts must then be bought separately.
UDL gold cup electrodes, pack of 10 (₹2,999 on 8 Nov) instead of FRI	Saves about ₹5,641 through VIT. Gold, not Ag/AgCl, so more drift with saline; your semi-dry evidence is for Ag/AgCl. Only if money runs short.
Skip Ten20 (₹1,890)	Fine if the semi-dry pods pass the drying test before the review; it is there so the demo can show eyes-closed alpha even if they do not.
Do not buy	ESP32-S3 DevKitC, Koss headphones, BMI270 chips for the board, PA12 bands, NuPrep, Micropore, PVA powder and glycerol, heat-set insert kits, FR4 strip, Philips 13955C pads, OpenBCI parts, BioAmp EXG Pill, drone LiPo packs (unprotected; the in-stock 1000 mAh ones on Robu are these).

4 · Checks before paying

• Re-open each link the day you pay; pay if the price is within 15% of this plan. 9 Nov stock: XIAO in stock at Robu (sold out at TNT and Atomlab); every protected 1000 mAh wearable cell at Robu and Probots was out of stock, which is why the 950 mAh YB-503450 is used.
• Battery plug: the YB-503450 page lists a 3-pin 1.25 mm connector; rev B's J1 is a 2-pin JST-PH 2.0. Cut it off and crimp or solder the 2 mm JST lead, red to the "+" beside J1 pin 2. Check with a meter before plugging in: rev B has no reverse-polarity protection.
• TP4056 charges at a fixed 1 A, about 1 C for this cell: charge on a hard surface, never inside the pod.

• GY-MAX30102: check the I²C pull-ups go to 3.3 V, not 1.8 V, before wiring it to J6.
• JLCPCB: upload the Gerbers, positions.csv and bom-jlc.csv for the real quote; the loading fee basis ("per system") and part count are estimates here. Recheck ADS1299 stock (367 on 9 Nov).
• Ask VIT purchase whether the JLCPCB and FRI orders can go through the institute import route; the ~10% duty is a plan assumption, not a quote.
• PN521: the harness range is not published. Measure it the day it arrives.
